

Potential of circular economy for MENA-Region

PD Dr.-Ing. Abdallah Nassour

PD Dr. Abdallah Nassour is an associate professor at the Professorship of Waste and Resource Management of the University of Rostock. He got his state doctorate degree in 2005 on the subject “Approaches to reform the waste management in developing countries”. He has worked in the field of waste management since 1995 mainly dealing with developing countries in the MENA-Region of Tunisia, Jordan, Egypt, Algeria, Kuwait, Algeria, Libya, etc. He has 27 years of practical experience in solid waste management and a circular economy. Since 1995, he has been scientific adviser for politics, municipalities, companies, and education in sustainable solutions for solid waste management and circular economy (laws, organization, financing, techniques, etc.). The focus of his experience lies in the areas of policy, Laws, Organization, financing of waste management, and knowledge transfer between Germany and the Arab regions. He is the team leader for TouMaLi-Project “Contribution of sustainable waste management systems in the tourism sector for the protection of marine ecosystems” between Germany and Egypt, Morocco and Tunisia.
